Supplement No. 1, Revised

PLANT QUARANTINE IMPORT RESTRICTIONS

OF THE NETHERLANDS

IMPORTATION OF WOODY PLANTS RESTRICTED
(San Jose Scale Regulations)

According to information received from Dr. Lee Ling, Food and Agriculture Organization of the United Nations, Rome, Italy, San Jose Scale Decree, published in the State Gazette No. 65, April 2, 1953, replaces the decree of July 30, 1951 and Decree of September 2, 1950, on the same subject. The modifications effected are as follows:

1. During the period October 1 through April 1 the importation of living woody plants is only allowed under the following conditions:

a. Each consignment of imported live woody plants shall be accompanied by two copies of a certificate issued by competent authorities in the country of origin after an inspection of the consignment which the inspector has found, to the best of his knowledge, to be free from the San Jose scale.

b. Plants of the genera Acer, Cornus, Cotoneaster, Crataegus, Cydonia, Fagus, Juglans, Ligustrum, Malus, Populus, Prunus, Pyrus, Ribes, Rosa, Salix, Sorbus, Spiraea, Syringa, Talia, and Ulmus, if the Director has not stipulated otherwise, are subject upon arrival in Holland to hydrocyanic acid treatment by or through the Plant Diseases Service, or be treated in a way indicated by the Director.

c. Clearance through the Customs has to be made in Utrecht, or in another place where the Director thinks sufficient guarantees against the San Jose scale are present.

2. The import and transit of living woody plants ~~is~~ prohibited during the period from April 1 to October 1, but conifers and all plants of Ericaceae are now excepted.

The following certificate form was drafted in accordance with the recommendations of the Conference on Plant Quarantine Regulations held in the Hague April 26 - May 2, 1950. Form EQ-375 apparently can be used to furnish all the required information.

PHYTOPATHOLOGICAL SERVICE
OF (Country)

No.

CERTIFICATE OF HEALTH FOR PLANTS AND PLANT PRODUCTS

This is to certify
that the plants, parts of plants or plant products
described below or representative samples of them were
thoroughly examined on (date) by (name)
. an authorized officer of the (service)
. and were found to be the best of
his knowledge to be substantially free from injurious diseases
and pests;
and that the consignment is believed to conform with the
current requirements of the importing country.
